ABSTRACT
For eons, the drama and theatre played vital role in portraying and creating influence among its audiences. Its history’s root goes far behind in past till 6th century BC Greece where the representation of theatrics grows from its sap from merely three type of drama: tragedy, comedy and satyr plays. With upgradation of technology at our finger tip, the drama have evolved from stage theatrical to cinema and finally into webseries. Technology is an element that has always created an impact in human kind irrespective of age and generation. From invention of light bulb to latest VR technology, the mankind is was quite enthusiastic and get easily influenced under them. After realizing this, many visual art medium have evolved not only in entertainment sector but also began to showcase social responsibilities to society where they have adapted it into its production as well. This study is conducted to inquire and collect data regarding the how the youth of today world get influenced under various social aspect and the role played by OTT-Platform, Amazon Prime.

KEYWORDS: Amazon prime, Youth, Technology, social responsibilities, Generation Gap,Trends

INTRODUCTION
The emergence of television as a medium
The invention of television occurred at a time when print media and radio dominated worldwide communication. Following the successful development of television units, it was only available to the wealthy and privileged in most Western hemisphere societies. Television instantly became a trend in countries such as America and other European nations, with most of the upper class and elite societies adopting it as a symbol of power and money. Within a few years, nations such as Japan and China began mass production of televisions and their accessories for domestic consumption as well as export worldwide, resulting in a global drop in television prices. In 1952, the first news covered in America was regarding the presidential nominating conventions of the two major parties. The concept of television was introduced in the late 1950s, more or less as part of a hobby rather than a commercial aim. Even after commercializing television, it had very little impact or influence due to a lack of receivers or an audience. The "Philips and RCA corporations" exhibited a closed-circuit television network at a New Delhi industrial expo in 1955 and afterward, delivered the technology to the government. AllIndia Radio (AIR) created the foundations of the country's first TV station, which began transmitting in September 1959, using this refurbish equipment and a few extra cameras. Doordarshan is an independent "public service broadcaster" established by the government of India. It was established on September 15th, 1959, and is India's largest transmitting organization in respect of studio and transmission network. Today, Doordarshan has grown from a single studio in the All India Radio departmental headquarters to a network of 66 studio facilities across the nation, comprising 17 major studio facilities in state capitals and 49 other studio facilities throughout the country. However, with headvent of private stations, Doordarshan has lost its former audience. The "Over-The-Top" (OTT) platform is a new and future medium for movies and television shows. This is distinct from standard broadcast means, such as television. As internet access has grown exponentially, this new innovation has left DTH (Direct-to-Home) technology in the dust. The OTT Platform has defined a new way of watching content on Smart TV Later, many OTT platforms have evolved, such as Netflix and Amazon Prime, which were established in the late 2010s, and soon appreciated for their content, raising the OTT platform venture to greater heights. Even though OTT platforms have been available in India since 2008, they have had a significant impact on the public, particularly during the global pandemic COVID-19. Easy access to various content (such as web series and movies) including international and regional and avoid social gathering in places (eg:theatres,etc)

- The content covered or released though OTT Platform is does not have any specific time period; hence it is always available anytime.
- Compared to traditional broadcasting methods, OTT Platforms are easily watch able though devices such as Mobiles, Smart TV, Laptop and more.
- Sometimes all episodes of the web series are released in one shot; hence it’s ideal for bench watching and more.

Web series are series, usually in an episodic manner, released and watched on the Internet. To access the website, one must have devices that are internet connectable, such as smart phones, laptops, PCs, smart televisions, and more. The episodes released (also known as websisode, which are not largely well known) are limited and the time period is usually 30 to 60 minutes.

REVIEW OF LITERATURE
In our modern times, OTT Platforms or (Over-the-top Platforms) have created a great impression in entertainment sector (A Study on Growth of Over the Top (OTT) Video Services in India:BY- Tripti Kumari, Department of Business Studies, Chandigarh University, Mohali, India), according to the study many people have evolve d from traditional media to latest trends
mainly youngsters. The younger generations are familiar with web series (An Analytical Study of Content and Language of Indian Webs Series: BY- Dr. Subhash Kumar, Associate Professor, Department of Journalism & Mass Communication, Manipal University Jaipur, India and Dr. Atanu Kumar Mohapatra Chairperson, Centre for Diaspora Studies, Central University of Gujarat, Gandhinagar, Gujarat, India) and the aim of our paper is to find the influence they are gaining from the two Amazon Prime series “4 More Shots, Please!” and “Made in Heaven”.

Many prominent actors have been casted in web series over years Studies have shown (The Future of Over-The-Top Platforms after Covid-19 Pandemic: BY- Revati Devaki P C, MPhil research scholar, Department of Visual Media & Communications, Amrita School of Arts and Sciences, Amrita Vishwa Vidyapeetham, Kochi, India and Dr. S. Dinesh Babu, Assistant Professor (Sr.Gr) and Head, Amrita School of Arts and Sciences, Amrita Vishwa Vidyapeetham, Kochi, India) that the popularity of OTT platform have increased due to covid-19 and many may not cancel their subscription post covid as well. Studies also have shown (New Media as a Change Agent of Indian Television and Cinema: A study of over the top Platforms: BY- Dr. Paramveer Singh Assistant Professor, Department of Mass Communication and Media Studies, Central University of Punjab, Bathinda- 151001) the steady increasing OTT Users and also the that future of “Over the top” applications are bright in India. Indian audience thinks that these applications have good future in this country and the reasons for this are smart phone penetration, International collaborations between media moguls and digital quality of the medium. Cost effectiveness is also one of the reasons behind good future of streaming media in India. According to study conducted by Anindita Chattopadhyay (Web Series and Web Movies and their psycho- sociological impact on netizens in India: BY-Anindita Chattopadhyay, PhD Research Scholar Dept of Mass Communication, Burdwan University & Assistant Professor Journalism and Mass Communication Department Taradevi Harakh Chand Kankaria Jain College, Kolkata), the viewer are psychologically affected and our paper need to know and understand audience responses towards the above mentioned series. Also in recent times, web series have gained lot of attention and its fame is spread across various media house.

METHODOLOGY

Research methodology is the specific procedures or techniques used to identify, select, process, and analyze information about a topic. The Methodology part of a research paper will let the user/reader to identify and assess if the study is valid and reliable.

Quantitative Research

It is basically method of acquiring knowledge from various individuals using sampling and sending out online surveys to gather Public knowledge, gaining results in numerical form. This research consist data collected from a certain section of the society About the influence of Amazon Prime in Youth today.
