Abstract- There has been high occurrence of blister, acne, carbuncle, rosacea, hives, latex allergy, psoriasis, etc have been begun with high occurrence in India. Since decade many successful formulations in ayurveda prescribed by ayurvedic physicians, for several skin diseases, numerous popular herbs were clinically analysed for various skin diseases. Commonly known as diseases that is Raktagatakushta (blisters), Mukhadushika (acne), Pidaka (carbuncle), Kushta (rosacea), Sheetapitta (hives), Vdarda (latex allergy), Kitibha (psoriasis). Ayurvedic traditional formulations showed remarkable result on various skin diseases modification of traditional formulations into new form are satisfied and also potent. Herbal formulations prepared from metals and minerals were also safe and productive internally as well as externally. These studies are considered as methodologies in recent ayurvedic clinical research and drug development.

Key word- carbuncle, rosacea, blister, acne, hives, latex allergy, psoriasis.

Introduction

Skin disease is a state of our skin in which anatomical and physiological change in our skin takes place. These changes occur due to cross of threshold of skin by any foreign substance. That foreign substance might be sensitive to our skin. Skin diseases normally cause rashes, itching, inflammation, redness, patches, burning sensations, pyrexia, irritation etc. It can cause the change in the appearance of skin. Skin Disease can occur as a result of imbalance in any of the three doshas, but occurs more due to pitta dosha or the heat element. Any activity that contributed to the rise of heat element, in the body, that can lead to skin diseases. From the perspective of Ayurveda, the main cause of any disease related to skin is due to the improper lifestyle and dietary routine that go against the basic nature or constitution of skin also called as prakriti. Before treatment is prescribed for skin disease, Ayurveda recommends to appropriately evaluate the skin condition of the individual and also diagnose their food habits, pulse, lifestyle, general health and dosha composition. The main focus of Ayurveda treatment of skin diseases is to balance the imbalance of doshas in the body and that can be achieved with traditional therapies mentioned in classical Ayurveda text along with balanced diet, meditation, herbs and daily routines. Panchakarma is one of the best Ayurvedic treatments for skin disease that restores the doshic balance and promotes skin disease by removing the toxins that have accumulated in the body. Panchakarma therapy is a complete detoxifying program that flushed out toxins from the body and cleanses it. When the toxins are excreted out from the body, the doshas gain eq. and skin the doshas gain to their normal physiology. There are various herbs, ointments and ayurvedic medicines that gives relief to the skin diseases, its treatment methods are always point on addressing the main cause of the disease so that the individual can heal their skin or eliminate the individual can heal their skin or eliminate the symptoms of skin disease [Thaker H et al,1999].

Causes of Skin diseases

Dietary causes: Excessive intake of block gram, sesame jaggery, milk products, yoghurt, fish, fermented food, oily food, sour food prepared with vinegar or sauce can result in several skin problems, even overeating and consumption of incompatible foods together like fish and milk, sour fruits and milk can be the causative factor for skin disease.
